

Stack Pipe DL75

Application

The DL75 stack pipe from J.A. Plast is a discreet solution for stack pipe venting above roof to prevent unpleasant odours from toilet drainage systems.

Please refer to national standards.

- · For pitched roofs
- Ø75 mm pipe
- Can be manufactured for any profile

Design

The DL75 stack pipe design leads rainwater away from the opening and has a built-in protective grille to keep out leaf fall. The vent is supplied installed on a base plate shaped to fit the roof profile 100%. Easily installed with the rest of the roofing material and discreetly built in the vent presents a nicely integrated solution.

Colour and Surface

Special coloured, glossy or structured with sand or granules the vents can be supplied with a 100% colour and surface match individually adjusted to each roofing material.

Materials

Stack vent and adapter: HIPS (High Impact Polystyrene).

Tubivent: PP (PolyPropylene).

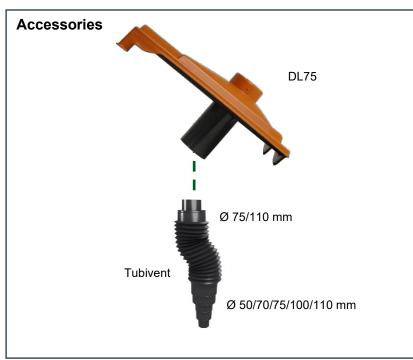

Handling

Keep in original packaging during transport.

Do not wrap and expose to heavy load during transport.

Remove plastic bag before placing in sunlight.

Roofing accessories supplied from J.A. Plast match roof profile, colour and surface 100%. The current product list and further information can be found on our homepage, www.japlast.com.
