

Sanitary Vent HV COMBI

Application

HV COMBI from J.A. Plast is a combination of two vents in one. One for outlet from living quarters like kitchen, bathroom and laundry room – one for stack pipe venting above roof to remove unpleasant odours from toilet drainage systems.

HV COMBI is also ideal for heat recovery systems and other types of mechanical ventilation.

The sanitary outlet has a spiro pipe insulated with EPS, which makes it very efficient for outlet of humid air reducing the risk of condensation significantly.

Please refer to national standards.

- Sanitary outlet $\text{Ø}160 \text{ mm}=20,000 \text{ mm}^2$
- Stack pipe $\text{Ø}110 \text{ mm}$
- Can be manufactured for any profile

Design

HV COMBI is supplied on a base plate shaped to fit the roof profile 100%. Easily installed with the rest of the roofing material and always following the roof pitch.

Colour and Surface

The vent is supplied with a 100% colour and surface match. Individually adjusted colours e.g., glossy, structured, or chipped surface.

Colour and surface treatment make the vent resistant to UV Radiation, variation of temperature and influence of climatic conditions in general.

Materials

The vent: HIPS (High Impact Polystyrene).
Insulation: EPS (Expanded polystyrene).

Handling

Keep in original packaging during transport.

Do not wrap and expose to heavy load during transport.

Remove plastic bag before placing in sunlight.
