

# Cowl Vent LV200

## Application

The cowl vent LV200 from J.A. Plast is a discreet and efficient choice for ventilation of the roof space and batten cavity.

*Please refer to national standards.*

- For pitched roofs 15° – 45°
- 20,000 mm<sup>2</sup> ventilation area
- Can be manufactured for any profile

## Design

The LV200 vent is designed specially for climates with high relative air humidity, where ventilation is even more essential. It has a built-in protective grille to keep out insects and drifting snow. The vent is supplied installed on a base plate shaped to fit the roof profile 100%.

Easily installed with the rest of the roofing material and always following the roof pitch the vent presents a nicely integrated solution.

## Colour and Surface

Special coloured, glossy or structured with sand or granules the vents can be supplied with a 100% colour and surface match individually adjusted to each roofing material.

## Materials

The vent is manufactured from HIPS (High Impact Polystyrene).

## Handling

Keep in original packaging during transport.

Do not wrap and expose to heavy load during transport.

Remove plastic bag before placing in sunlight.

*Roofing accessories supplied from J.A. Plast match roof profile, colour and surface 100%. The current product list and further information can be found on our homepage, [www.japlast.com](http://www.japlast.com).*
