

Flex Ridge RK200

Application

The Flex Ridge RK200 from J.A. Plast is used for ventilation of the roof space and batten cavity.

Ventilating through the ridge is an efficient way to prevent condensation and moisture from causing dry rot and damage to the roof construction.

Please refer to national standards.

Supplied as:

PLAST for pitch 15°- 30° and 30°- 45°

ZINC (two-piece) for pitch 15°- 60°

- **20,000 mm² ventilation area**
- **Manufactured for flat profiles only**

Design

The RK200 is designed for outlet through the ridge. It has a built in protective grille to keep out insects and drifting snow.

The Flex Ridge can be supplied with fixings and are easily installed with the rest of the roofing material. The plain design adds an elegant finish to the ridge.

Colour and Surface

Special coloured, glossy or structured with sand of granules the ridge can be supplied with a 100% colour and surface match individually adjusted to each roofing material. Can also be supplied in zinc.

Materials

RK200 can be supplied in HIPS (High Impact Polystyrene) or in zinc.

Handling

Keep in original packaging during transport.

Do not wrap and expose to heavy load during transport.

Accessories

Roofing accessories supplied from J.A. Plast match roof profile, colour and surface 100%. The current product list and further information can be found on our homepage, www.japlast.com.
