

# Eaves Closure

## T-M / T-U / T-F

### Application

The Eaves Closure from J.A. Plast is specially designed for roof profiles with fixed dimensions, for installation at the eaves, functioning as birds stop as well as air intake.

*Please refer to national standards.*

- For pitched roofs
- 0 - 10,000 mm<sup>2</sup>/m ventilation area
- Can be manufactured for profiles with fixed dimensions

### Design

The design of the Eaves Closure lets the roof sheet rest on the vale and let in air at the top. It can be designed to match each particular roof profile 100%. The Eaves Closure is also available without ventilation.

The Eaves Closure is easily installed with the rest of the roofing material.

### Colour and Surface

The eaves closure is manufactured in black and is installed under the roofing material, making any further surface treatment unnecessary.

### Materials

Eaves closures are manufactured from HIPS (High Impact Polystyrene).

### Handling

Keep in original packaging during transport.

Do not wrap and expose to heavy load during transport.

With ventilation

Without ventilation

Flat without ventilation

*Roofing accessories supplied from J.A. Plast match roof profile, colour and surface 100%. The current product list and further information can be found on our homepage, [www.japlast.com](http://www.japlast.com).*
