

Ridge Junction FO-Y, T, L, X

Application

FO-Y, T, L or X are elements for covering junctions between ridge and hips and valley.

Please refer to national standards.

- Cover for junctions
- Can be supplied for any type of ridge

Design

The selection is wide:

Y-junction for hipped roof can be supplied for roof pitch of 15-30° and 30-45°.

Alternatively without “legs” universal fitting.

Other possibilities are the two-way L-junction, three-way T-Junction or four-way X-junction.

The elements are manufactured in shape and measures matching the customer's roof profile. Nicely integrated and easily installed with the rest of the roofing material.

Colour and Surface

Special coloured, glossy or structured with sand of granules the vents can be supplied with a 100% colour and surface match individually adjusted to each roofing material.

Materials

The elements are manufactured from HIPS (High Impact Polystyrene).

Handling

Keep in original packaging during transport.

Do not wrap and expose to heavy load during transport.

Remove plastic bag before placing in sunlight.

Roofing accessories supplied from J.A. Plast match roof profile, colour and surface 100%. The current product list and further information can be found on our homepage, www.japlast.com.
