

Foam Sealing Wedge SF-W

Application

Foam sealing strips from J.A. Plast are designed for sealing between roof and valley, bargeboard or other applications on the roof requiring a waterproof protection.

Please refer to national standards.

Available as:

- Polyurethane foam, 55x55x55 mm, length 1300 mm
- Impregnated Polyurethane foam 30x50x55 mm, length 1000 mm
UV stable, self-adhesive on one side

Design

The foam sealing strips are manufactured in shape-stable, flexible polyurethane foam adapting 100% to the roof profile. Easily and quickly installed. Applicable with any roof type and material.

Colour

Dark grey.

Materials

The foam sealing strips are manufactured from Polyurethane foam.

Handling

Remove wrapping with caution.

Do not cut or in any other way damage the product during unpacking and installation.
