

Tubivent

Application

Tubivent from J.A. Plast is for sanitary ventilation as flexible pipe between the vent on the roof and the exhaust from kitchen, bathroom or laundry room – or as part of the stack pipe venting system. Tubivent leads water vapor safely through the roof space and out. It can be used with most sanitary vents from J.A. Plast.

Please refer to national standards.

- From Ø75/110 to Ø50/70/75/110
- Length up to 600 mm
- Quick and easy installation
- Can be used with most outlets

Design

Tubivent is designed for installation with Ø75 mm stack pipes and with Ø110 sanitary outlets.

Tubivent can be adapted to fit sanitary installations of Ø50, 70, 75 and 110mm (fits Ø110 mm inside and outside).

The bellows shape makes the Tubivent flexible and adjustable without any sharp angles.

Supplied in bags with 2 zip ties.

Materials

Tubivent is manufactured from polypropylene.

Colours

Supplied in black.

Installation

Installation of the Tubivent is quick and easy. Adapt the Tubivent with a hand saw at the top and bottom according to connecting pipes.

Fasten the Tubivent with the 2 enclosed zip ties, and tighten with a pair of pliers.
